

# M110 Magnetic Mount

Designed for automobile communication antenna, M110 is a magnetic mount for use with the antenna of UHF male connector. The mount, with magnet at the bottom, is compression molded with ABS plastic shell, suitable for the roof of automobile or other metal surface installation.

| Specifications      |                                   |          |
|---------------------|-----------------------------------|----------|
| Model               | M110                              |          |
| Freq.Range-MHz      | 0~500                             | 500~1000 |
| VSWR                | ≤1.2                              | ≤1.3     |
| Impedance-Ω         | 50                                |          |
| Max.Power-W         | 100                               |          |
| Mount Connector     | UHF female                        |          |
| Cable Connector     | N male or Customized              |          |
| Mount Dimensions-mm | Φ110×50                           |          |
| Mount Weight-Kg     | 0.76( may vary with cable length) |          |
| Cable Length-m      | 3 or customized                   |          |
| Cable Loss-dB/m     | ≤0.3                              | ≤0.7     |
