

## Peltor™ ComTac™ Electronic Level Dependent Hearing Protector

MT15H68FB-02

- Level dependent function in stereo
- Last setting is stored when switched off
- Fully independent dual earphone system for level dependent and external radio signal, for maximum security
- An external radio signal has priority and will function even when the ComTac is switched off or out of power
- Kevlar-encased cables
- High quality head band made from stainless steel and leather
- Automatically switches off after two hours if no function is used. Two signals are emitted as a warning that the ComTac will switch off in one minute if no function is activated
- Battery life is about 250 hours (AA batteries). Three warning signals are emitted every 30 seconds for five minutes when power is low, then the headset switches off
- Audio input jack to allow connection to an external radio
